MARCH 2012

Homegrown beauty concept store Jet Concepts delivers on its promise of results-based beauty with a new treatment and mask – the **Jet Plasma** and the **Rejuvenating Peptide Mask**.

PLASMA POWER

What's the ultimate beauty secret to keeping aglow this season? The Jet Plasma, which uses powerful plasma energy to re-energise skin, leaving it brighter and clearer after just 45 minutes! In just one session, you can see improvements to skin elasticity, radiance, and texture, as well as reductions in pore size, wrinkles and fine lines.

At the same time, Jet Plasma contours

and firms skin, just like a lunchtime facelift, so you emerge with slimmer and sharper facial contours without going under the knife. Post-treatment, skin continues to look radiant and clear, and collagen fibres continue to remodel over the next three months. The best part is: there's no downtime, no pain, and no risk of burns.

DID YOU KNOW?

Jet Concepts is the first and only centre to use the Plasma RF machine, previously only available in doctors' clinics. So now, you can enjoy the same efficacy and results without paying a premium for the Jet Plasma treatment.

JUST FOR MUM
This Mother's Day, give Mum a special treat with a Jet Concepts gift pack that comprises one session of Jet Plasma, one Rejuvenating Peptide Mask and a 15 ml Cell Renewal at only \$98. Valid for May 2012, while stocks last.

STEP 1: Refresh and exfoliate

Like all Jet Concepts treatments, Jet Plasma starts with lymphatic drainage using the Jet M device. Then, the Plasma RF machine is used to give skin a Plasma Peel, also known as a blue peel. It uses electrode dielectric barrier discharge technology to clear skin of bacteria and contaminants while boosting the growth of healthy cells, leaving skin whiter, brighter, and clearer in minutes.

STEP 2: Firm and tone

A clear, water-based gel is applied to allow maximum penetration of RF energy. RF energy rejuvenates and tightens collagen fibres at the vascular and cellular levels, so skin becomes firmer, and

more elastic and supple. The deal-clincher – you not only emerge with a slimmer face immediately after the treatment, but skin continues to get firmer and more toned for three months after just one session of the Jet Plasma!

STEP 3: Rejuvenate from deep within

For that picture-perfect finishing touch, yellow light energy is delivered to promote skin rejuvenation, energise lethargic skin cells, and give skin a luminous glow that apes the result of eight hours' sleep!

The Jet Plasma costs \$380 for a 45-minute session (\$168 for an introductory session). For best results, we recommend four to six sessions, done two weeks apart.

BOTOX-IN-A-SHEET **THE NEW MASKED HERO IS CHOC-A-BLOC WITH A BOTOX-LIKE PEPTIDE THAT RELAXES MUSCLES AND STAVES OFF SIGNS OF AGEING.**

Jet Concepts' Rejuvenating Peptide Mask is the at-home equivalent of a Botox jab.

VANISH FINE LINES: Its wonder ingredient is **argireline** – a peptide known as a topical Botox alternative because of its muscle-relaxing prowess. Thanks to its interlaced fibres, this bio-cellulose mask can **hold up to three and a half times more active ingredients** than regular paper masks. That's why the Rejuvenating Peptide Mask contains copious amounts of this potent peptide to relax muscle fibres, diminishing the amount of fine lines.

SUPER-SOAKER:

To plump skin with moisture, it also contains hyaluronic acid, which can hold up to 1,000 times its weight in water. An anti-ager, hyaluronic acid is also essential in preventing the formation of lines and wrinkles.

INSTANT BENEFITS: "The results are almost instantaneous," says Gladys Cheng, founder of Jet Concepts.

"Skin texture will look visibly different. It will be smoother, due to the softening of fine lines and wrinkles. It will also look plump, supple and refreshed, due to the process of skin rehydration."

HOME USE: The Rejuvenating Peptide

Mask is gentle enough for all skin types. Simply apply it on a cleansed face for 30 minutes to allow for maximum absorption of the active ingredients, and do not rinse after removing. For the best results, use it once or twice weekly.

The Rejuvenating Peptide Mask retails at \$45 for a pack of three, and \$18.80 apiece.

“There are many reasons this mask is great, but its most defining quality is that it rids skin of fine lines and wrinkles.”

– Founder of Jet Concepts Gladys Cheng

GLADYS' TRAVEL TIP: "Cabin air can be extremely dry, so it's very important to keep a moisturising agent handy. Bring a Rejuvenating Peptide Mask for those tedious long-haul flights. You can even go to bed with it – that is, if you are adventurous enough!"
