

THE ULTIMATE FACIAL FUEL

Kick-start your skin's regenerating mechanism today. The **Jet Cell Restore** treatment can rejuvenate, repair and restore skin cells to youthfulness after only 20 short minutes under high-powered LED lamps.

CELL ENERGISER

The same way the sun provides energy for plants, the light energy from **Jet Cell Restore** treatment powers skin cells, stimulates collagen production and creates a healthy skin matrix.

From the high-tech labs of Photo Therapeutics Ltd, the Omnilux machine offers three different LED lights to target different cellular functions – red light to fuel cells, blue light to kill bacteria, thus reducing acne, and infrared light to heal wounds and reduce inflammation.

These LED light colours have different wavelengths that correspond to the peak absorption of respective cellular functions. That's how they activate skin cells to achieve specific skin-saving benefits.

Jet Cell Restore powers your skin cells to self-rejuvenate!

1

FOUR STEPS TO REVERSE AGEING

Like all Jet Concepts' treatments, the Jet Cell Restore begins with the **Jet-M** machine. Developed by a former Russian rocket scientist, this cutting-edge piece of technology delivers saline and oxygen in a gaseous form at supersonic speed to cleanse, buff and prompt lymphatic drainage. Since dead skin cells reflect light, sloughing them off helps prep the skin for optimal absorption of the LED light to come.

JET CELL RESTORE
(45 minutes) costs **\$180** per session, and **\$98** for the introductory session.

2

The Jet-M machine then infuses the skin with key actives depending on your specific skincare needs. A high-performance **vitamin A & E** serum is chosen for exfoliating and revitalising benefits, **vitamin B5** is chosen for acne-prone skin, and **glycolic acid** chosen if key concerns are to soften, smoothen and even out skin.

3

Once the skin has been properly prepped, intense **LED light** is shone on skin for 20 minutes to accelerate cellular function. Skin then continues to repair itself at accelerated speed even days after the treatment!

4

To wrap the session on an indulgent note, a quick **acupressure massage** is deftly performed, making the Jet Cell Restore a treat for both your skin and senses!

after the treatment, b) kills bacteria – great for acne-prone skin, as it prevents bacteria from spreading, and c) aids in wound healing. Unlike the LED light, lasers are used to do more specific aesthetic work.

How is Jet Cell Restore better than other LED light therapies?

As a rough guide, the greater the number of bulbs in the LED machine, the greater the light energy. Many skincare salons offer LED light therapies that are not powerful enough to deliver results.

Jet Concepts uses the Omnilux machine, which has 700 LED bulbs. The sheer multitude of bulbs is intense enough to jolt the skin into accelerated repair.

The Jet Cell Restore was designed for the skin's cellular layer, and is an exceptionally effective procedure in itself. But when paired with the Jet Facial, the results are phenomenal.

COLOUR CHART TO LED THERAPY

How was the Omnilux machine developed?

The Omnilux machine was developed by Photo Therapeutics Ltd, a leading company in light therapy, after 12 years of extensive research.

How often should I go for this treatment?

Ideally, at least once a month, but you can choose to do it weekly if necessary.

JET CONCEPTS FOUNDER GLADYS CHENG ANSWERS FIVE KEY QUESTIONS ABOUT THE JET CELL RESTORE TREATMENT

What are the key benefits of the Jet Cell Restore?

It helps to reduce acne and photo-damage, and rejuvenates skin, working days after the treatment is over!

What is the essential difference between the Jet Cell Restore and regular laser skin rejuvenation facials?

The Jet Cell Restore delivers LED light through 700 bulbs, so it covers a larger surface area than, say, a single laser beam. It essentially a) energises cells – that's why skin looks brighter

THE NIGHT SHIFT

The perfect complement to Jet Cell Restore, **Jet Cell Renewal** is a home-use product that boosts cell regeneration nightly while you're getting some shuteye.

Retinol increases the rate of cell renewal by acting as an exfoliant, unclogging pores and removing dead cells, and enhances collagen production, consequently increasing skin density and resilience. It essentially restores radiance, smoothens fine lines and wrinkles, and leaves skin beautifully supple. \$66.80 (15 ml) and \$109.80 (30 ml) exclusively at Jet Concepts.

GROOMING HIGHLIGHTS

From now till the end of the year, Jet Concepts will be pampering the important men in your life by offering **50 per cent off** its signature **Jet Facial**. This ultra-cooling facial exfoliates, tones and brightens skin by blasting skin-saving oxygen and saline at supersonic speed onto the face. Fast, fragrance-free, fuss-free and high-tech, it's the definitive facial for the modern male. 45-minute at \$75 for men only (Usual price: \$150)

Jet Concepts is located at #03-03 Wheelock Place, tel: 6733 7055; and #B2-20/21 Raffles City Shopping Centre, tel: 6337 9598
